

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: March 26, 2008

Water Body Under Evaluation:

Water Body ID #: 1265
Name: East Creek (Class C)
Length of Segment: 7 miles
County(ies): Cass

Use Attainability Analysis (UAA) Study:

UAA ID #: 0674
Submitter: SES, Inc.
Date(s) Conducted: October 24, 2007
Date Received: November 14, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA was conducted in October 2007 and no WBCR was observed. No interviews were conducted during the survey. A rope swing and fishing tackle were reported at Site #3. During a 2005 interview, surveyors found fishing tackle, footpath/prints, an ATV path, and beer cans at Hwy. YY (their site #2).

Is the evaluated use attainable? ☒ Yes ☐ No

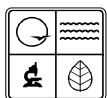

Comments: The stream met the maximum depth criterion at all four sites evaluated. Due to meeting the maximum depth criterion and the presence of a rope swing, the committee recommends the WBCR use designation be retained. Due to evidence of secondary contact (fishing tackle, footpath, etc.), the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

- ☐ Add Use
- ☒ Retain Use
- ☐ Remove Use
- ☐ Modify Use
- ☐ Inconclusive
